

SPEED UP AND CUSTOMISE YOUR DEVELOPMENT BY LEVERAGING A PURPOSE-BUILT LOGISTICS MOBILE PLATFORM

Enterprise Edition

Enterprise Edition

Leverage a purpose-built logistics mobile platform for rapid development of your own mobile solution

Trimble Smartdelivery Enterprise Edition is a commercial off-the-shelf software for larger transport, logistics and postal organisations with advanced customisation needs. The platform offers a comprehensive out-of-the box logistics workflow library to get you quickly up and running.

It offers a comprehensive set of tools and integration options to transport management systems and other back-end systems. The guided workflows are designed to enable usability and simplicity. The solution is fully configurable to fit existing and future business processes. The system is role-based and can be accessed both via web and mobile user interfaces.

Key users:

The driver receives today's manifest, including detailed task instructions, and performs compliance checks in a simple format.

The receiving customer gets notifications about deliveries and communicates changes directly to the transportation company on a web landing page.

The depot worker can instructions on how to load a specific vehicles to match the optimal route.

The office worker uses the business intelligence tool to analyse the operational data and understand where improvements can be made.

- **UPGRADE** YOUR LOGISTICS OPERATION BY USING A BEST-OF-BREED MOBILE LOGISTICS APPLICATION

BENEFITS OF OPTIMAL FLOW

Smartdelivery is purpose-built to enhance your transport and logistics operations.

- ▶ Short time to market, with pre-configured workflows and functionality, based on industry best practice.
- ▶ An extensive and configurable platform, enabling a close fit to existing processes and swift deployment for new concepts.
- ▶ A global experience, with more than 170,000 active users daily, spread across a secure infrastructure, reducing risk for your business.
- ▶ Extensive and intuitive integration options, including pre-built integrations to existing partner software and services.
- ▶ A mature and refined mobile user experience, which has evolved over time to ensure reduced training times for all user demographics.
- ▶ Supports the growth of your business through powerful software add-on capabilities, and a vast partner network for hardware.

Purpose built for logistics organisations with advanced customisation needs

Powerful add-on modules:

Navigation – Turn-by-turn truck navigation, ETA calculation and route optimisation

Customer interaction – Notification to recipients, interaction and driver instructions

Advanced route optimisation – Ability for the dispatcher or route planner to assign stops to routes, making the operations as efficient as possible

Reporting and dashboards – Business analytics to understand and measure organisational KPIs, such as unsuccessful deliveries, route statistics and more

Key features

Enterprise class

Scalable, compatible, robust and secure

Purpose-built

Designed for optimising logistics businesses

Configurable

Configure work steps, business rules and dynamic forms

Extendable

Seamlessly incorporate third-party applications, maps, sensors and more ...
